selkirk flood protection scheme

WS-1A - A708 Wall: Proposed Programme - January to April 2016

	January	February	March	April
West bound lane closure Temporary traffic lights in operation	4			
Full Road closure to install pipe under road 2 or 3 days in late January / early February	•			
Site Clearance				
Earthworks				
Construction of reinforced concrete wall				——
Works in the burn				
Reinstatement Works				——
Temporary traffic lights removed Road fully reopens				*

Due to the nature of the works, the duration and precise timings of each activity is subject to change. The above is the current proposed programme for this work section. This has been prepared taking into account issues and concerns raised during the Work Section 1 review in Spring 2015.
